SOLKEI
ELECTRONICS

COMPANY OVERVIEW

The execution partner for Tapp-off and electrical systems projects.

One point of contact.
A partner network assembled around the job.
Thirty years of large industrial projects.

01

Responsibility for the execution phase, through one contact.

Our first job is to find out what you actually need, not to sell something ready-made. Execution and delivery are always ours. We agree in advance how far into design and site work we go.

02

Project size is not a limit. The network is assembled around the job.

Partners are confirmed at the tender stage, before work starts. Ready for scopes worth hundreds of millions, with dozens of partner companies.

03

Thirty years of large industrial projects.

Founder Juha Katainen's background is in major projects and heavy industry. Work follows the client's quality standards and work instructions.

SCOPE

We deliver the client's project as a complete, end-to-end solution: from planning and scheduling to on-site delivery packages.

- Project management and leadership
- Materials management, project scheduling, and logistics
- Managing project changes
- We assist the client and the end user in their project work
- Clear scoping and task definition from the very beginning
- Quick response to changes and financial cost impacts

AS NEEDED — ALWAYS OURS — AS NEEDED

01
Design
Fully or in part, depending on the client

02
Execution
Always Solkei

03
Delivery to site
Always Solkei

04
Site
We take part when needed.

WHAT WE DELIVER

Tapp-off systems · Electrical centres · Switchgear · Electrical systems · Enclosure assembly, electrical or not

Site deliveries executed according to customer guidelines.

CLIENTS

Our clients are large and global, and most of the current work is for data centres. Location is not a limit: we deliver wherever the project is.

RELIABLE PARTNER

Our Reliable Partner report (Luotettava Kumppani, Vastuu Group) shows that tax, pension and statutory obligations are in order. Available on request.

QUALITY

We work to your quality standards and work instructions.

We don't bring our own system into your project. We work inside yours.
